

# KU Initiatives for the SDGs

All of KU's efforts to achieve the SDGs can be encompassed in and related to the principle of **“Creating Knowledge and Human Resources to Achieve the SDGs” - KU Triangle for the SDGs - through partnerships with “the region” and “the world.”**

Based on this principle, **“KU Initiatives for the SDGs,”** a “guideline” for future-oriented actions for achieving the SDGs, will serve as the engine of the **“KU SDGs Promotion Task Force,”** led by the Trustee for Social Co-Creation with the Vice President for International Affairs acting as the sub-leader, to accelerate necessary efforts for realizing the SDGs under a powerful framework.

## KU's Principle for the SDGs' Promotion ~KU Triangle for the SDGs~

**“Fostering and producing human resources for the SDGs” through partnerships between “the region” and “the world.”**

“Guideline” for future-oriented actions for achieving the SDGs

## KU Initiatives for the SDGs

### **Initiative 1** (Research)

We aim to solve social issues by promoting research that integrates sustainable economic activities, an inclusive society, and a healthy global environment.

### **Initiative 2** (Education)

We aim to develop leaders who will lead the region's sustainable development from a global perspective through the promotion and development of ESD.

### **Initiative 3** (Governance)

We aim to create a campus environment and community that will serve as a model for a recycling-based society, taking into consideration the wellness of students, faculty, and staff.

### **Initiative 4** (Finance)

We will strengthen our systems to support the achievement of the SDGs by enhancing our financial base through internal and external engagement.

### **Initiative 5** (Collaboration)

We will convey a clear vision and concrete actions that will reach all stakeholders, including the SDG native generation.
